Event Lead Capture System

Transform business card collection into automated lead generation using Microsoft Power Platform

Evelyn Treasa Jaison

The Challenge

At campus events and meetups, business cards are collected manually, creating inefficiencies that slow down follow-up and create data quality issues.

Time-Consuming Data Entry

Manual input takes valuable time away from follow-up activities.

Duplicate Leads

Same contacts captured multiple times across different events.

No Quick Follow-Up

Delayed notifications prevent timely engagement with prospects.

AI-Powered Solution

An automated system that captures, extracts, and distributes lead information instantly using Microsoft Power Platform.

Project Architecture

Power Apps

Scan business card

AI Builder

Extract details

Dataverse

Store leads

Power Automate

Send notification

Power BI

Analytics dashboard

Core Technologies

Microsoft Power Apps

Mobile and web application for capturing business cards at events.

AI Builder

Business Card Reader model for intelligent data extraction.

Microsoft Dataverse

Centralized data storage for all lead information.

Power Automate

Automated workflows for notifications and duplicate checking.

Power BI

Interactive dashboards for tracking lead performance.

App Features

01

Scan Business Card

Capture card image using mobile or web app

02

Auto Extract Details

Name, email, and phone extracted automatically

03

Manual Editing

Review and edit any extracted fields

04

Assign Owner

Designate team member responsible for follow-up

05

Save to Database

Store lead information in Dataverse

Automation Flow

Trigger: New Lead Added

Lead saved to Dataverse database

Check for Duplicates

Verify if email already exists

Send Email Notification

Owner receives lead information instantly

Analytics Dashboard

Power BI provides real-time insights into event lead performance and conversion tracking.

Leads per Event

Track performance across different events and locations

Leads by Owner

Monitor distribution and workload by team member

Conversion Tracking

Measure follow-up success rates and outcomes

Distribution Insights

Analyze lead sources and engagement patterns

Project Benefits

Faster Lead Capture

Instant scanning and extraction eliminates manual data entry time.

No Duplicate Entries

Automatic duplicate checking ensures clean, accurate data.

Automated Notifications

Owners receive lead information instantly for immediate follow-up.

Better Analytics

Comprehensive dashboards provide actionable insights into event performance.

Future Improvements

Multiple Owner Assignment

Support assigning a single lead to multiple team members

Dynamic Email Distribution

Send notifications automatically to all assigned owners

Microsoft Teams Integration

Real-time alerts through Teams for instant awareness

Lead Prioritization

Enhanced automation with intelligent follow-up scheduling

THANK YOU
